Rigid ducting for existing fire hall

Rigid ducting installed

3,846.00

Remove temporary ducting that is lying on the ground and is a tripping hazard.
Install rigid ducting up away from walking/working area and strap it up in the air facing fire trucks. There are two units
First units ducting well go straight up and tee off right and lift and have 4 registers
Second units ducting well go down back wall and have 4 registers for other side of building
Also there is no filter grills or filters at all.
we well install filter grills and filters to furnaces.

Subtotal	3,846.00
Total	\$3,846.00
