Hi Kristen,

Thank you again for meeting with me to review Streamline's DocAccess solution. Below is a quick recap of our conversation along with the meeting recording and service agreement link.

Recording: [Watch Here](#)
Service Agreement: [DocAccess Service Agreement](#)

Summary of Discussion

- **Legal risk:** California's **AB 434** and the **Unruh Civil Rights Act** are driving PDF accessibility enforcement.
- **Your inventory & pricing:** **253 PDFs / 1,449 pages** → **Essentials plan (2,000 pages) at \$100/month**. Rate can align with your budget cycle and remains **locked** despite growth.
- **How DocAccess works:** Original PDF's stay the same; users can toggle an **on-demand WCAG 2.1 AA HTML transcript** for screen readers, **no manual tagging** required.
- **Key features:**
 - **Aira** 24/7 live visual interpreter for complex visuals (maps, charts)
 - **AI-powered search/Q&A** (answers only from the document)
 - **Digital Table of Contents** for quick navigation
 - **150+ language** translation (future-proofing for anticipated Brown Act updates)
- **Why now:** Manual remediation is **\$7/page** and time-intensive; DocAccess automates compliance at about **\$0.05/page/month** for continuous coverage.

Next Steps

- I'll send a **summary, recording, and DocAccess service agreement** today, plus a calendar invite for **next Wednesday**.
- You will **review the proposal with the General Manager** and confirm if board approval is needed.
- We'll reconnect **next Wednesday** to review budget/approval and finalize the path forward.

If anything additional is needed here, please feel free to reach out!

Best regards,

Justin Erickson
