

## Indian Valley Fire February 2026 Report

I am happy to start with the turn-out for our meetings every week has been pretty good. We are still not able to include Crescent Mills in our meetings, but that is going to change soon as the station clean-up is going well.

Our calls for service have been a little slower. We had 15 medical aids and 1 lift assist, 3 reported fires and 1 motor vehicle accident.

We were able to get the pest control service done for Crescent Mills and working on ordering a dumpster for that location. We are also working on getting post control services at the Indian Falls Fire Hall.

We are also working on the contract with the U. S. Forest Service and waiting for maps of our fire district boundaries.

We are also working on the required items we need to finish obtaining the I.S.O. Inspection scheduled for the middle of March which will keep the department very busy accomplishing the required items for our rating.

Respectfully submitted

DennieWright

Acting Chief
