

Grant Updates

GM, Bonnie Mullaney

2-23-2026

WWTP construction grant: Geotechnical report is complete. Waiting for the credit review to be complete and then we should expect approval for the construction grant. Soonest we could see an executed agreement is May/June 2026. We could be going into construction in the beginning of 2028. I was concerned about the classification of our WWTP changing with the system upgrades in the grant, but it won't be. It will still be a class 2 WWTP. That's great news for the license requirements of the District operator(s).

Wastewater collection system planning grant: Waiting until around April or May to get approval from the State for the time extension and budget increase amendment PACE submitted. There are a lot of things changing in the grant funding world. I am really hoping we can justify 100% funding for this project. Correcting the high I and I (ground water infiltrating our collection system) will be imperative to a functioning treatment plant.

Earmark grant revenue: I am in the process of applying for earmark funding from Kevin Kiley's office. I am really trying hard to make the deadline.

Additional Grants: Curtis at PACE has provided me with a list of upcoming grant options I can apply for.
