

The Indian Valley Fire Department has been very busy the last few weeks. Along with our meetings every week, we have responded to 24 medical aids, 8 fire calls and two public assists.

Our last four meetings have been at Crescent Mills and Indian Falls Fire Stations to get them ready to respond to calls for service and the I.S.O. Inspection which has been tough, but we are finally gaining on the situation.

We have a truck in Crescent Mills that is fully equipped and tested as of this past Saturday. We also have a truck equipped in Indian Falls with all that is possible because of the room on the truck. We also want to thank Charles for attending the meeting with the ISO inspector. His knowledge of the Crescent Mills water system was appreciated.

We also completed our part of the fire agreement with the US Forest Service opening the way to get paid for mutual aid with the Forest Service fires outside of our area.

We also want to thank Sam Brown for his help to get the fire truck in service in the Indian Falls Fire Hall.

In closing, I would also like to thank everyone else in the department for their help getting everything ready for this very important inspection.

Respectfully submitted,

Dennie Wright, Acting Fire Chief

Indian Valley Volunteer Fire Department"
