

Education Report

Chester Public Utility District

3-16-2026

Bonnie Mullaney, GM

- **CRWA Expo:** I applied for a scholarship to attend the Expo in Tahoe that CRWA puts on, April 28th to 30th. It is an operator-based educational seminar with a lot of great classes. I'll inform you when I know if I receive the scholarship and can attend.
- **Financial Management Webinar:** The Board and I completed the required financial management class on March 4th. Office staff can take the on-demand class when it is available. If the Board would like to discuss what they learned in the financial management class, it is a good time to do it during this report.
- **IQS Training March 4th Cheryl and Kelly:**

This training was for anyone that will be using the IQS system to add people and their qualifications for Wildland purposes.

The IQS system translates to IROC which shows the people and their quals as current and available for dispatch. IROC used to be able to do the same tasks of updating people etc., but that is being shut down. Every department has to move to IQS. They learned how to transfer people in and out of the system, update quals and training, run a lot of different reports, and many other valuable tasks. This is an essential software to all fire departments in Plumas County. It was a very important training.
- **Brown Act:** Tami and Rick have to complete the Brown Act class by July 1st, 2026. Every Board member must do it within the first 6 months. It never hurts to brush up if other board members want to take it again.
- Friendly reminder to not shy away from classes on CSDA.net or other platforms. We all bring something to the table. If you learn something that you want to add to the education report, please let me know. We can always discuss what you learned during this report, too!
