

**RESOLUTION NO. 2543**

**RESOLUTION OF APPLICATION BY THE CITY COUNCIL OF THE CITY OF PORTOLA REQUESTING THE PLUMAS LOCAL AGENCY FORMATION COMMISSION TO INITIATE PROCEEDINGS FOR THE FORMATION OF A NEW FIRE PROTECTION DISTRICT AND REORGANIZATION OF EXISTING FIRE SERVICE PROVIDERS IN THE AFFECTED TERRITORY**

Resolved, by the City Council of the City of Portola (“the City), that:

**WHEREAS**, the City in conjunction with other affected agencies approving substantially similar resolutions and listed within this resolution, desires to initiate proceedings pursuant to the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, commencing with Section 56000 of the California Government Code and California Health and Safety Code Sections 13800-13970, also known as the Fire Protection District Law of 1987, for the formation of a new fire protection district and the concurrent dissolution of the Beckwourth and Sierra Valley Fire Protection Districts and the divestiture of power/transfer of responsibility to provide fire protection, emergency medical and rescue services by the Gold Mountain Community Services District and the City of Portola (as multi-service agencies), contingent upon the formation of the proposed fire protection district as authorized by LAFCo and approved by election; and

**WHEREAS**, the City of Portola, Beckwourth Fire Protection District, Gold Mountain Community Services District, and Sierra Valley Fire Protection District, hereinafter referred to as “Participating Fire Agencies”, are authorized to provide fire protection, emergency medical and rescue services within their respective boundaries directly or by contract based on their respective formation documents and principal acts (California Government Code Section 38600, et seq., California Health and Safety Code Section 13800, et seq., and California Government Code Section 61000, et seq.); and

**WHEREAS**, in 2017, the City of Portola made the decision to close its fire department and contract for services, which was the impetus for several discussions and meetings amongst the region’s fire protection providers and the public seeking a means to address the common issues faced by the affected agencies, including but not limited to significant financial constraints in the face of rising costs, reliance on volunteers in a time of declining volunteerism, illogical fire service boundaries, disjointed service operations and planning, and maintaining full governing bodies from small population bases; and

**WHEREAS**, in 2020, the Participating Fire Agencies each signed a memorandum of understanding forming the Local Emergency Services Study Group (LESSG) with the intent of considering structure options to address the common challenges to effective fire protection and emergency medical services in the region; and

**WHEREAS**, in 2020, the LESSG came to the unanimous conclusion that formation of a new fire protection district combined with dissolution of the existing fire protection districts and divestiture of fire protection services by multi-service agencies was the preferred option for the region to best address the shared challenges faced by the Participating Fire Agencies, and to enhance services to the community; and

**WHEREAS**, the Participating Fire Agencies jointly financed a feasibility study, conducted by an independent consulting firm selected through an open and public process with the issuance of a Request for Proposals, with said study concluding that a newly drawn fire protection district would beneficially merge the operations of four different agencies currently providing fire services into one efficient, effective, and sustainable emergency services system, providing a proactive, sustainable solution for future fire and emergency service needs for the area by creating a regional district with an improved economy of scale and associated benefits; and

**WHEREAS**, in October 2022, the Participating Fire Agencies each unanimously approved the feasibility study and directed the LESSG to compile an application to the Plumas Local Agency Formation Commission for the reorganization described in the feasibility study/plan for services (Exhibit B); and

**WHEREAS**, the Plumas Local Agency Formation Commission, hereinafter referred to as Commission, serves as the review authority over the formation and reorganization of cities and special districts as contained in and authorized by the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, hereinafter referred to as “the Act”, commencing with Section 56000 of the California Government Code; and

**WHEREAS**, the Act establishes the process pursuant to which citizens or legislative bodies of local agencies may seek the formation and reorganization of cities and districts; and

**WHEREAS**, in order to facilitate the formation of a new fire protection district, through adoption of this resolution of application, the City of Portola has assumed the principal role in initiating the proposal and requesting the Commission to commence its review process by the filing of an application with the appropriate fees paid jointly by the Participating Fire Agencies; and

**WHEREAS**, the proposed reorganization is consistent with the adopted spheres of influence for the City of Portola, Beckwourth Fire Protection District, Gold Mountain Community Services District, and Sierra Valley Fire Protection District ensuring that there is no duplication of services within the resulting boundaries of the proposed fire protection district, through dissolution of single service fire providers as indicated by the “Zero Sphere of Influence” adopted for the Beckwourth Fire Protection District and Sierra Valley Fire Protection District, and divestiture of fire and emergency medical services as indicated by the “Limited Service Sphere of Influence” adopted for Gold Mountain Community Services District; and

**WHEREAS**, notice of intent to adopt this resolution of application has been given, and this Council/Board has conducted a public hearing based upon this notification, and has received and considered comments presented at that hearing; and

**WHEREAS**, the territory proposed to be reorganized is considered to be inhabited (more than 12 registered voters) and a description of the boundaries of the territory to be included within the proposed fire protection district and a map of the proposed boundary designated as set forth in Exhibit A, are attached hereto and by this reference incorporated herein; and

**WHEREAS**, the reasons for the proposed reorganization are as follows:

1. The four agencies provide essentially the same fire protection and emergency medical services in the region and face substantially similar challenges to providing adequate and sustainable services, consisting of:
  - a. Ever increasing mandatory requirements and standards.
  - b. Limited volunteers and volunteer recruitment and retention programs and incentives.
  - c. Inadequate levels and types of training opportunities.
  - d. Limited administrative capacity to address growing organizational requirements.
  - e. Insufficient funding to cover growing expenses.
2. The reorganization would allow the new district to better meet the emergency fire, rescue, and medical needs of its communities. The newly formed district will implement a phased plan for creating a uniform level of service within the entirety of its territory which would allow:
  - a. Better utilization of resources.

- b. Enhanced capital asset planning and streamlined improvement process.
- c. Enhanced response to emergency incidents based on key operational activities performed by paid professionals, paid part-time readiness staff, expanded paid personnel, fleet and station readiness, and district-wide uniform training and procedures.
- d. Reduced operating and administrative costs while increasing service levels.
- e. Enhanced efficiency of management through combining of technology infrastructure, fleet maintenance, and other administrative functions.
- f. Enhanced and standardized public education outreach.

**WHEREAS**, the following agencies would be affected by the proposed jurisdictional changes:

1. City of Portola;
2. Beckwourth Fire Protection District;
3. Gold Mountain Community Services District; and
4. Sierra Valley Fire Protection District.

**WHEREAS**, it is desired to require that the proposed reorganization be subject to the following terms and conditions:

1. A new fire protection district be formed with the proposed boundaries as identified in Exhibit A (map and legal description of boundaries of proposed district).
2. The new fire protection district will be named “Beckwourth Peak Fire Protection District”.
3. Beckwourth Fire Protection District and Sierra Valley Fire Protection District shall be dissolved, and the new fire protection district named the successor for both agencies, including all rights, responsibilities, properties, contracts, assets and liabilities, and functions of the Beckwourth Fire Protection District and the Sierra Valley Fire Protection District, and any funds to which it succeeds may be expended and properly disposed of as provided by Division 12, Part 2.7, Chapter 1, Health & Safety Code, Fire Protection District Law of 1987 (commencing with Section 13800 et seq.), as itemized in Asset Transfer Schedules Exhibits C (Beckwourth Fire Protection District) and D (Sierra Valley Fire Protection District).
4. Gold Mountain Community Services District shall be divested of the power to provide fire protection and emergency medical services, and the new fire protection district named the successor of those services within Gold Mountain Community Services District’s boundaries. Gold Mountain Community Services District will maintain its powers to provide wildland fire response and hazardous fuels reduction and will continue to levy a special tax to support these services.
5. The City of Portola shall transfer the responsibility of providing fire protection and emergency medical services, and the new fire protection district named the successor of those services within the city limits.
6. Gold Mountain Community Services District shall irrevocably convey to the new fire protection district the real and personal property described in the Asset Transfer Schedule attached hereto as Exhibit E upon district formation.
7. The City of Portola shall irrevocably convey to the new fire protection district the real and personal property described in the Asset Transfer Schedule attached hereto as Exhibit F

upon district formation.

8. All fire protection volunteers of the City of Portola, Beckwourth Fire Protection District, Gold Mountain Community Services District, and Sierra Valley Fire Protection District who meet the qualifications for volunteer fire fighters established by the new fire district shall be invited and encouraged to apply with the new fire protection district.
9. All full- or part-time employees of the Beckwourth Fire Protection District and the Sierra Valley Fire Protection District shall be invited and encouraged to apply with the new fire protection district.
10. Beckwourth Fire Protection District and the Sierra Valley Fire Protection District do not have any full-time employees. No benefit programs are offered to any employees. The board of the new fire district is urged to consider severance payments to employees of the predecessor agencies on a case-by-case basis, if the circumstances of transition to the new district warrant such action.
11. The successor agency shall function under and carry out all authorized duties and responsibilities assigned to a Fire Protection District as outlined in the Division 12, Part 2.7, Chapter 1, Health & Safety Code, Fire Protection District Law of 1987 (commencing with Section 13800 et seq.) and other applicable laws, with the exception of ambulance services presently provided throughout the territory to be included in the proposed new fire protection district by Eastern Plumas Healthcare District.
12. A tax exchange agreement shall be negotiated with the County to maintain at least the existing level of property tax income received by Beckwourth Fire Protection District, Sierra Valley Fire Protection District, and Gold Mountain Community Services District for the successor agency, as provided for in Government Code Section 56810. In addition, the City of Portola shall petition the Board of Supervisors to reallocate a \$70,000, in total, of its existing property tax income, across each of its tax rate areas, to the successor agency. A reallocation formula shall be based upon the FY 2022/23 tax roll information maintained by the County Auditor to determine how much of the \$70,000, in base property tax revenue, will be reallocated from each tax rate area. This is a one-time adjustment that shall continue in perpetuity without further regard for the amount of income generated for the successor agency. Each fiscal year thereafter, the successor agency would continue to receive the base amount and would receive its full share of the annual tax increment, based on the growth in assessed value. The City of Portola shall solicit the County to address existing tax rate incongruities resulting from historical boundary changes during tax sharing negotiations. All resolved incongruities shall be reflected in the FY 2022/23 tax roll information for purposes of the reallocation calculations described above.
13. Formation of the new fire protection district shall be conditioned upon approval of a new special tax by the registered voters of the new fire protection district that would include the following provisions:
  - a. A new revenue source will be required to support the new fire protection district's ability to build and sustain adequate community fire and rescue services for the entire service area. To this end, an annual special tax will be proposed for Assessor's Parcels located entirely or partially within the proposed fire protection district boundary, based on land use types provided by the Assessor's Office. The proposed special tax will raise funds to plan, finance, implement, manage, own, and operate a regional fire protection district to provide community fire and emergency medical response

- services. The new special tax must be approved by two-thirds of the votes cast by registered voters residing within the proposed fire protection district's boundary.
- b. Low Income Exemption – The new fire protection district recognizes the proposed special tax may create a burden for low-income property owners in the region. For this reason, the New Fire District shall establish procedures for implementing a Low Income Exemption, to allow landowners who fall within the U.S. Department of Housing and Urban Development (HUD) income limits for “very low” or “poverty level” to apply for a partial or complete exemption from the tax.
  - c. Contiguous Parcel Exemption – The new fire protection district shall establish procedures for implementing a Contiguous Parcel Exemption to allow Assessors Parcels which are categorized as Rate ID "C" under provisions of the special tax, and contiguous, undeveloped, held under identical ownership, shall upon approval of an application of the owners thereof to the District Board, be treated as a single parcel for purposes of this special tax.
  - d. Inflationary Adjustment - The proposed special tax will also include an inflationary adjustment to account for the ever-increasing costs of fire equipment, apparatus, diesel fuel, insurance and other items which typically increase at rates that exceed average inflation. To ensure that the proposed special tax will retain its purchasing power in future years, it is proposed to include an inflationary clause which will allow the new fire protection district Board, to adjust the tax annually, if needed, by no more than the cost of living as measured by the Consumer Price Index (CPI) for the preceding year as prepared by the United States Bureau of Labor. This increase will not exceed 3% each year and must be approved by resolution at a properly noticed public hearing.
14. All previously authorized charges, fees, assessments, and/or taxes currently in effect dedicated to fire protection or emergency medical response, now levied or collected by each of the four agencies, including improvement or assessment districts thereof, shall cease to be levied and collected by each of the four agencies and the successor agency, apart from Gold Mountain Community Services District which will continue to levy a special tax to support wildland fire response and hazardous fuels reduction.
  15. A charges and fee structure for services rendered will be adopted by the new fire protection district board, including procedures by ordinance to administer the special tax including exemptions that balance the needs of the district for funding and the burdens on property owners and file such ordinance with LAFCo.
  16. The provisional appropriation limit of the new fire protection district shall be set by the Plumas Local Agency Formation Commission for the first full year of operations per Government Code Section 56811.
  17. Indebtedness of each of the four agencies, if any, shall remain the legal obligation of only the lands and areas which incurred such indebtedness; however, the outstanding indebtedness of each of the four agencies at the time of consolidation shall remain the obligation of the successor newly formed fire protection district.
  18. The composition of the successor new fire protection district board of directors shall be five (5) member board of directors, elected at-large, each of whom must be a registered voter residing within the district and whose term must be four years, with the exception of the initial board that would have staggered terms with three members serving four-year terms and two members serving two-year terms as determined by agreement of those elected in order to classify staggered terms beginning after the next general district election. The terms of office of the elected board members are determined pursuant to the

Uniform District Election Law.

19. Contract services presently provided by Sierra Valley Fire Protection District to Hallelujah Junction Fire Protection District shall be continued by the successor new fire protection district based on the existing contract.
20. The services to be provided by the successor District shall be provided in a manner consistent with the “Plan for Services” attached hereto as Exhibit “B” and incorporated herein by reference.

**WHEREAS**, the City of Portola has assumed Lead Agency status for this project under the California Environmental Quality Act (CEQA), with the remaining Participating Fire Agencies serving as Responsible Agencies; and

**WHEREAS**, the City has determined that this project is categorically exempt from CEQA pursuant to CEQA Guidelines Section 15320 (Changes in organization of local agencies) because it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment – where the activity consists of changes in the organization or reorganization of local governmental agencies where the changes do not change the geographical area in which previously existing powers are exercised – and that does not involve development or a change in the manner for which an existing service is provided.

**WHEREAS**, this Council has determined that since a majority of the members of each of the legislative bodies of the four local agencies are adopting substantially similar resolutions of application for this reorganization, the Resolution of Application meets the criteria for requesting a waiver of election proceedings and a waiver of the final Conducting Authority hearing, as set forth in Government Code Section 56853 with regard to the dissolution and divestiture of powers applications; and

**WHEREAS**, upon approval by the Plumas Local Agency Formation Commission it is recognized that an election must occur of registered voters of the territory within the proposed new fire protection district, including majority voter approval of the question of formation of a new fire protection district and two-thirds voter approval of the proposed special tax, pursuant to California Health and Safety Code Section 13823 and California Government Code Section 50077.

**NOW THEREFORE BE IT RESOLVED**, by the City Council of the City of Portola as follows:

SECTION 1. Findings of Facts. The above recitals are adopted as findings of fact.

SECTION 2. Adoption of Resolution of Application. This Resolution of Application is hereby adopted and approved, and the Local Agency Formation Commission of Plumas County is hereby requested to take proceedings for the reorganization of territory described in Exhibit A (Map and Boundary Description) consisting of the formation of a new fire protection district, the dissolution of the Beckwourth and Sierra Valley Fire Protection Districts, and divestiture of the power/transfer of responsibility to provide fire protection, emergency medical and rescue services by the Gold Mountain Community Services District and the City of Portola (as multi-service agencies) according to the terms and conditions stated above and in the manner provided by the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, Government Code Section 56000, et seq.

SECTION 3. California Environmental Quality Act CEQA. The City hereby determines that this project is categorically exempt from CEQA pursuant to CEQA Guidelines Section 15320 (Changes in organization of local agencies) because it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment – where the activity consists of changes in the organization or reorganization of local governmental agencies where the changes do not change the

geographical area in which previously existing powers are exercised – and that does not involve development or a change in the manner for which an existing service is provided. With respect to this determination, staff is directed to comply with CEQA, including filing a Notice of Exemption with Plumas County and to post it on the City’s website.

SECTION 4. Other Acts. The Officers and staff of the City are hereby authorized and directed, jointly and severally, to do any and all things, to execute and deliver any and all documents, which, in consultation with the City Attorney, they may deem necessary or advisable in order to effectuate the purposes of this Resolution, and any and all such actions previously taken by such Officers or staff members are hereby ratified and confirmed.

SECTION 5. Effective Date. This Resolution shall take effect upon adoption.

**PASSED, APPROVED AND ADOPTED** by the City Council at a regular meeting thereof held on the 22<sup>nd</sup> day of February 2023, by the following vote:

## INTRODUCTION

---

Eastern Plumas County is served by a number of small fire protection agencies that have been established over time to provide fire and emergency response services to communities. Over the last decade, the rising costs of equipment, increase in severe wildfires, and decline of volunteers has made it more and more difficult to provide services in many rural areas including those located in eastern Plumas County. Continued growth and scattered residential development has also resulted in dispersed areas that demand services but are currently outside of any local jurisdiction that is responsible for providing fire services. Local fire agencies often respond to calls in these non-jurisdictional “no-man’s-land” areas but do not receive property tax or other consistent and reliable revenue to support the service. Due to this, the agencies in this region have come together to research and identify the best course of action to ensure the safety of all communities through adequate and sustainable provision of emergency response services.

In January 2020, a Local Emergency Services Study Group (LESSG) was created to explore ways to strengthen and improve the provision of fire and emergency services throughout the region. The LESSG is comprised of representatives from each participating agency. After collecting information on the status of the existing districts and robust discussion with stakeholders, the LESSG recommended that the best course of action was to form a new fire protection district that would consolidate services in the region. This Plan for Service details the formation of the Beckwourth Peak Fire Protection District including how services will be provided upon formation and how services will be funded.

### Existing Agencies

Currently, eastern Plumas County is served by a network of small fire-related districts that out of necessity have well-coordinated mutual aid relationships. The agencies included in the current proposal are:

-  Beckwourth Fire Protection District (FPD): Provides fire protection and emergency response services to the greater Beckwourth community and services by contract to the City of Portola and Gold Mountain Community Services District (CSD).
-  Gold Mountain CSD: Previously contracted with the City of Portola fire department (1997-2017) and Eastern Plumas Rural FPD (2018-2022), and beginning January 2023 will begin contracting with Beckwourth FPD to receive fire protection and emergency response services.
-  Sierra Valley FPD: Formed in 1948, Sierra Valley serves a 220 square mile area and also provides services by contract to Hallelujah Junction FPD in Lassen County.
-  City of Portola: Currently has two modern stations in the city limits and contracts with Beckwourth FPD as of February 2021.

Upon approval of the formation, the Beckwourth Peak FPD will maintain the fire protection services that are currently provided by the existing departments as specified in Health and Safety Code Section 13862, which include:

-  Fire protection services
-  Rescue services
-  Emergency medical services

- ✂ Hazardous material emergency response services
- ✂ Other services relating to the protection of lives and property

The proposed formation will officially merge the operations of four different agencies currently providing fire services into one efficient, effective, and sustainable emergency services system. This will provide a proactive, sustainable solution for future fire and emergency service needs for the area by creating a regional district with an improved economy of scale and associated benefits.

## Plan for Service

This plan for services has been prepared to support the proposed district formation and detail how services will be provided and funded by the New Fire District. It has been prepared according to the information required by §56653(b) of the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 (CKH act) which states:

(b) The plan for providing services shall include all of the following information and any additional information required by the commission or the executive officer:

- (1) An enumeration and description of the services currently provided or to be extended to the affected territory.
- (2) The level and range of those services.
- (3) An indication of when those services can feasibly be extended to the affected territory, if new services are proposed.
- (4) An indication of any improvement or upgrading of structures, roads, sewer or water facilities, or other conditions the local agency would impose or require within the affected territory if the change of organization or reorganization is completed.
- (5) Information with respect to how those services will be financed.

A plan for services takes into account the services, capacity, cost and adequacy of services within an area and how those services would be affected by the proposed action.

## Proposed Reorganization/Formation

The proposed formation would serve to consolidate services into a regional district and establish a reliable source of revenue to support services. The Beckwourth Peak FPD will be governed by a five-member board of directors elected by the registered voters residing within the boundaries of the new district. The formation will result in the concurrent dissolution of the Beckwourth FPD and the Sierra Valley FPD, the divestiture of power to provide fire protection by Gold Mountain CSD, and the transfer of responsibility for providing fire protection by the City of Portola (also known as a “reorganization”). All remaining assets will be transferred to the Beckwourth Peak FPD as the successor agency.

*Table 1: Proposed Reorganization/Formation*

Affected Agency	Proposed Change
<b>New Fire Protection District</b>	Formation and Successor Agency
<b>Beckwourth FPD</b>	Dissolution and transfer of assets to the NFD
<b>Sierra Valley FPD</b>	Dissolution and transfer of assets to the NFD
<b>Gold Mountain CSD</b>	“Divestiture of power” to provide fire protection services

<b>City of Portola</b>	Transfer of Responsibility to provide fire protection services and transfer of assets to the NFD
------------------------	--

#### Definitions

“Affected local agency” means any local agency that contains, or would contain, or whose sphere of influence contains or would contain, any territory for which a change of organization is proposed or ordered, either singularly or as part of a reorganization or for which a study is to be reviewed by the commission (Government Code section 56014).

“Commission” means a local agency formation commission (Government Code section 56027).

“Formation” means the creation of a district (Government Code section 56039).

“Dissolution” means the disincorporation, extinguishment, or termination of the existence of a district and the cessation of all its corporate powers, except as the commission may otherwise provide pursuant to Section 56886 or for the purpose of winding up the affairs of the district (Government Code section 56035).

“Divestiture of power” means the termination of the power and authority to provide particular functions or classes of services within all or part of the jurisdictional boundaries of a special district (Government Code section 56037.2).

“Principal act” means, in the case of a district, the law under which the district was formed and, in the case of a city, the general laws or the city charter (Government Code section 56065).

“Reorganization” means two or more changes (i.e., formation, dissolution, divestiture, etc.) of organization contained within a single proposal (Government Code section 56073).

### Proposed Terms and Conditions

The proposed reorganization/formation will be subject to the following terms and conditions:

-  The approval of the Beckwourth Peak FPD formation would be subject to a two-thirds majority vote by the registered voters within the proposed district boundaries in favor of a special tax.
-  The approval of the Beckwourth Peak FPD formation would be subject to a property tax sharing agreement with Plumas County.

Any change of organization or reorganization may provide for or be made subject to one or more terms and conditions. However, no terms and conditions shall directly regulate land use, property development, or subdivision requirements (Government Code Section 56886).

## CURRENT CHALLENGES

---

Eastern Plumas communities are served by a network of small fire agencies which, out of necessity, have well-coordinated mutual aid relationships. Beckwourth FPD and Sierra Valley FPD, along with other local mutual aid partners, are the first responders to all fire and emergency response services, including wildland and structure fires, car accidents, medical emergencies, as well as public assistance calls. Local fire agencies provide and receive mutual aid when needed, providing sufficient resources to each incident, regardless of whose jurisdiction it is in. While these agencies are already working together and training together, the proposed formation would serve to formalize services into a regional district model, with an improved economy of scale and associated benefits. A consolidated district would address significant financial challenges each agency is experiencing and address sustainability as it relates to shared needs and challenges related to the following:

-  **Aging Infrastructure and Equipment** - Agencies are for the most part 70+ years old with aging infrastructure and equipment. Unfortunately, with the rising cost of new and even used fire apparatus, it is becoming increasingly difficult for volunteer departments to maintain a strong apparatus fleet. For instance, a used Type 1 Engine purchased in good condition can cost up to \$150,000 or more. In addition, there is a need to address deferred maintenance at some stations and expand the headquarters station to include additional apparatus bays and classrooms.
-  **Increasing Demand for Services:** Firefighting and EMS requirements continue to grow along with increasing demand for services that exists with an aging population, increased visitors to the county, unprecedented fire risk, and greatly increased vehicular traffic on regional highways.
-  **Volunteer Recruitment and Retention:** Society is changing, people no longer volunteer like they once did. Requirements for volunteers are now much more stringent and demanding making it even harder to attract volunteers. The region needs standardization and a volunteer training model that provides various tiers of involvement and engagement. Consolidation provides opportunity to enhance volunteer recruitment and retention programs, offer reimbursements for training or service calls, and better utilize volunteer resources.
-  **Daytime Staffing:** Changes in laws, OSHA requirements, time commitment and other limitations, has resulted in a significant reduction in the number of volunteer firefighters. In particular, daytime response can be challenging as volunteers are at work or have other commitments. As the call volume continues to increase, there is a need to have daytime staffing coverage to supplement volunteer response and increase response times.
-  **Strain on existing agencies:** Currently 155,029 acres or 51% of the land area of the New Fire District currently falls outside of established fire districts with no guarantee of structural fire and EMS protection. Fire districts were formed to provide structure fire and all risk services within a specific jurisdictional boundary where services are supported by revenue from a combination of taxes, fees, and fundraising. Many of these jurisdictional boundaries were created as far back as the 1940's. Since that time, neighborhoods, scattered subdivisions, and rural residential development have emerged outside of district boundaries. These developed areas require year-round fire protection and emergency services. Providing goodwill service to these areas is not supported by any sustainable revenue source and puts additional strain on already overburdened resources.

-  **Underserved Residents:** Approximately 15% of the estimated population within the New Fire District currently falls outside of established fire districts with no guarantee of structural fire and EMS protection. A wide variety of circumstances account for non-inclusion in a fire district. Historically lots were created without regards to fire protection and residents may not be aware that they are not in a fire district. In response to severe wildfire impacts and changes to state law, property can only be subdivided if it is located within the boundaries of a fire-related district. Being located within a fire district will allow subdivision to occur consistent with Plumas County General Plan and Zoning requirements.
-  **Irregular Boundaries:** Irregular boundaries and the number of fire providers in a small area contribute to challenges in coordination, consistency in training and response, and planning. Consequently, the region is plagued by a disjointed service delivery structure that lends itself to duplication of efforts and expenses related to administration, training, and operations. The lack of coordination and collaboration limits the agencies' ability to plan at a regional level and to leverage additional resources, grant funding, strategic partnerships, or influence policy changes at the local or regional levels.
-  **Insufficient Funding:** Funding is fractured and supported by a combination of inequitable property tax sharing, special taxes, and local fundraising opportunities. Property tax sharing is based on 1975 models which does not appreciate as quickly as ongoing expenses such as diesel fuel, insurance, fire engine replacement, firefighting and medical equipment, and equipment and supplies that expire and must be replaced on a regular basis. The New Fire District would be funded by a combination of property taxes and a new Special Tax that would be levied consistently throughout the district based on land use types provided by the Assessor's Office.
-  **Board Vacancies:** Generally, districts in the region face a lack of public interest in district activities as demonstrated by little to no attendance at board meetings, vacancies on boards, and a lack of contested elections. Many boards face challenges in maintaining a full governing body and find it challenging to recruit new board members when there are vacancies. This struggle is amplified in areas with very low populations. The New Fire District would be served by a five-member board of directors that would have a larger population base to recruit new directors. Furthermore, a single leadership body overseeing fire protection services in the region would better sustain participation from the larger community.

The Beckwourth Peak FPD will help build and sustain adequate community fire and rescue services for the entire region that is equitably supported by the communities served. Increased funding is needed to improve current training, personal protective equipment, emergency medical and firefighting equipment, and apparatus replacement, as well as to improve response times and operational capacity by supporting volunteer recruitment and retention programs and providing enhanced daytime coverage during business hours. The overall objective is to provide a cost effective, well trained, and professional volunteer fire agency for years to come through the implementation of modern and efficient programs and providing opportunities to our volunteers.

## REGIONAL OVERVIEW

Plumas County is located on the eastern edge of California within the Sierra Nevada Mountain range approximately 40 miles northwest of Lake Tahoe. Major access roads include the Feather River Highway (SR70), Highway 89, and State Route 36 near Lake Almanor. The focus of this study is eastern Plumas County including areas east of Highway 89 and Lake Davis and north of Frenchman Lake.

### Land Use

Land uses within the proposed New Fire District boundary are predominantly Timber Resource Land and Agricultural Preserve (see Figure 1). As noted in Table 2 below, additional land uses in unincorporated portions of the proposed district include Industrial, Rural Residential, Suburban Residential, and other use types. Land uses within the City of Portola are regulated by the City's General Plan and Zoning Code. Land uses in the City center are primarily low to medium residential with commercial, professional, and light industrial uses generally focused along CA-70 and the Union Pacific Railroad. There is also considerable open space and park land uses on the outer edges of the city. Formation of the Beckwourth Peak FPD is intended to support the needs of the current community and is not intended to induce growth or convert any agricultural or open space lands. No changes in land use types or intensities are included as part of this proposed formation.

## Population and Growth

As of the 2020 decennial census, Plumas County had an estimated population of 19,790. This is a slight decrease from the 2010 decennial estimate of 20,007. While the census had reported a population decline over the last decade, the California Department of Finance projects that Plumas County will have an almost 1.0% increase over the next decade.

The current population within the proposed Beckwourth Peak FPD is approximately 3,815 based on 2020 census estimates. This consists of the estimated population for each existing fire agency as provided in Table 4, and the remaining population for areas historically outside of any district responsible for providing community fire protection services. The area has observed slow residential growth in last the ten years. It should also be noted that there is a significant seasonal variation in population, particularly as it relates to tourists and resort facilities within the area.

*Table 4: 2020 Population*

Affected Agency	Population
City of Portola	1,916
Beckwourth FPD	618
Sierra Valley FPD	600
Gold Mountain CSD	76
Non-district	605
<b>Total Population of NFD</b>	<b>3,815 residents</b>

Source: LAFCo 2022 Municipal Service Reviews; 2020 Census

The City of Portola General Plan discusses the fact that population growth in Portola and surrounding area is likely to come from three primary sources described as follows:

- (1) Population growth in California and northern Nevada will generate a spillover effect as people seek to relocate to small communities from increasing development in more urban areas.
- (2) An aging population will generate an increase in retirees seeking small communities for second homes or a permanent retirement home.
- (3) Economic development will generate new job growth in service and tourism industries, and growth in small businesses whose leaders can choose a location based primarily on quality-of-life considerations.

While the city's historical growth rates and countywide growth rate projections indicate minimal or negative growth in the future, there are three planned developments within the city limits, which have the potential to add an additional 1,220 dwelling units to the City, or approximately 2,440 additional residents. This would be an increase over the 2020 city population of 127 percent. There are also existing planned developments in Gold Mountain and Beckwourth that are not fully constructed. Given the existing and planned growth in the region, there is a continued need for fire and emergency response services into the future. It is important to note that additional stations may need to be strategically located as planned developments are built out. For instance Beckwourth FPD has previously identified an area in its future growth area that will be difficult to serve—future homes along some areas along County Road A-23 are too far away from the District's stations, which will lead to longer response times.

## Disadvantaged Communities

Disadvantaged unincorporated communities, or “DUCs,” are inhabited territories (containing 12 or more registered voters) where the annual median household income (MHI) is less than 80 percent of the statewide annual MHI. DUCs are recognized as social and economic communities of interest for purposes of recommending SOI determinations pursuant to Section 56425(c). As of the 2020 Census, the California MHI was \$78,672. In order to qualify as disadvantaged, communities would need to have a MHI of less than \$62,937.

In addition to the incorporated City of Portola, there are several Census Designated Places (CDP) that exist in or near the proposed Beckwourth Peak FPD boundary. CDPs are a statistical geography representing closely settled, unincorporated communities that are locally recognized and identified by name. Table 5 shows the American Community Survey 2020 5-year Estimates for the City of Portola and three CDPs in the region. While other CDPs exist in the area such as Chilcoot-Vinton, Gold Mountain, Iron Horse, and Mabie CDPs, there is no reported MHI for these areas. This is likely due to limited population and survey responses.

*Table 5: Reported 2020 MHIs for Portola and Nearby CDPs*

Census Designated Place	2020 MHI
Beckwourth CDP	\$101,273
Delleker CDP	\$82,969
Lake Davis CDP	\$73,523
City of Portola	\$46,667

Source: 2020 U.S. Census Bureau

While the MHI for the CDPs appears to be greater than the DUC limit of \$62,937, there may still be DUCs in the area. Looking at census block group data, there are several areas in the region that may be considered DUCs. This includes areas outside of the incorporated Portola city limits. The existence of DUCs in the region indicates that there may be communities in need of vital services, including emergency and fire response, that may not have another means of obtaining these services. The proposed new district would enable these areas to secure these services and have a broader economic based to support the department.

## Wildfires

Over the last ten years, the frequency and intensity of wildfires has increased dramatically. Large tracts of dense forest have become dryer and more susceptible to fires due to droughts and increasing temperatures. This has led to some of the largest and most destructive fires the state has ever seen such as the August Complex and North Complex fires in 2020, and the Dixie fire in 2021. As temperatures rise and the risk of wildfire increases, it will be more important than ever to have a reliable fire department that can quickly respond to incidents before they escalate to unmanageable levels.

Although local fire departments are called upon to assist with wildfire suppression and are often the first to scene to ensure a fast and effective first engagement of any fire, the U.S. Forest Service is responsible for wildland fire suppression in the State Responsibility Area (SRA) and National Forest lands in Eastern Plumas County that are classified as Federal Responsibility Area (FRA). The U.S. Forest Service will respond to all fires in the SRA/FRA during fire season that represents a threat to the wildland. However, structure fire protection and rescue services are local responsibilities and not a U.S. Forest Service responsibility. In areas classified as Local Responsibility Area (LRA), which includes the incorporated area within the City of Portola as well as an unincorporated area south of Highway 70, local fire departments have the responsibility for suppressing wildfire. The U.S. Forest Service may

assist local districts with the management of wildfires in the LRA based on mutual-aid agreements. As a result of the widespread wildfires experienced the last couple of years, fire insurance is getting more difficult to obtain if someone chooses to live in a rural area. Being located within the boundaries of a fire district may greatly benefit landowners' ability to obtain fire insurance or keep the policy they already have. In addition, there have been changes in state law, so that property can only be subdivided if it is located within the boundaries of a fire-related district. Being located within a fire district will allow a property owner to develop or subdivide their parcel, if they choose to do so, and it is consistent with county General Plan and Zoning requirements.

## EXISTING FIRE AND EMERGENCY RESPONSE AGENCIES

As the demands on local fire and rescue service providers are increasing, it's getting harder to justify providing services in a patchwork way with limited budgets and growing demand for services. In 2021 alone, Beckwourth and Sierra Valley volunteer departments responded to over 500 emergency incidents within the proposed boundary of the new district. Approximately 70% of the total annual call volume are medical related (including vehicle accidents). Critical non-fire life safety calls have increased over time and require more resources to adequately serve those in need.

Like many other fire departments, Beckwourth and Sierra Valley are facing growing challenges that include:

- ✘ Ever increasing mandatory requirements and standards.
- ✘ Limited volunteer recruitment and retention programs and incentives.
- ✘ Inadequate levels and types of training opportunities.
- ✘ Limited administrative capacity to address growing organizational requirements.
- ✘ Insufficient funding to cover growing expenses, including:
  - The replacement of aging safety equipment and apparatus,
  - Communication equipment and infrastructure improvements,
  - Insurance and worker's compensation,
  - Training and certification for volunteers, and
  - Fire station maintenance and the growing need for an additional strategically placed station to improve response times.

Beckwourth and Sierra Valley are also struggling under the pressure of ever-increasing training and performance demands on volunteers and increasing call volume. None of these challenges will be easily overcome but members of Beckwourth and Sierra Valley are continually working to prepare themselves and their equipment to improve levels of community fire and rescue services and coordinated wildfire prevention and suppression to meet demand.

The following section provides a background summary of each participating agency. More information can also be found in the Eastern Plumas Regional Fire Municipal Service Review prepared by Plumas LAFCo ([www.plumaslafco.org/msrs-and-soi-updates](http://www.plumaslafco.org/msrs-and-soi-updates)).

### Beckwourth FPD

Beckwourth FPD was formed in 1948 and became a special district in 1949. The District was established to provide services to the Beckwourth community. The District has a five-person board of directors that meets on the third Wednesday of each month. The District's main sources of revenue are property taxes, special assessments, federal income, contract fire fees, and state grants. The FPD provides services outside of the boundary on a goodwill basis and through out-of-area service agreements with individual customers, with annual contract fees of \$200 for commercial uses and \$100 for residential. The District also has an existing out-of-area service agreement with Sierra Health Foundation. Since February 2021, the District has provided contract fire services to the City of Portola, which includes operating and staffing two city-owned stations within the incorporated limits. Beginning January 2023, the District will provide contract services to the Gold Mountain CSD. Beckwourth FPD is occasionally called upon to assist with wildland fire suppression within the SRA and FRA, and relies on seasonal reimbursements for strike team response, assistance by hire, or equipment rentals. While the reimbursements provide some relief, the wildfire season is unpredictable and is not a reliable source of funding to support the District.

Beckwourth FPD is considered a volunteer agency supplemented by paid staff. This includes a part-time fire chief, a part-time administrative officer, two volunteer division chiefs, two part-time captains, five part-time duty officers, and twenty volunteer fire fighters. The District operates two fire stations in the boundary and two stations in the City of Portola by contract. The main station within the boundary houses two engines, two Patrols, and one water tender. The main station currently has offices and will serve as the headquarters station for the Beckwourth Peak FPD. The second station is shared with the United States Forest Service (USFS) and houses one engine, one wildland engine, a support vehicle and a trailer. More information on the city stations is below.

As the demand for services increases, Beckwourth FPD continues to look for opportunities to enhance services and expand volunteer recruitment and retention efforts. They are currently working with the County Sheriff's Office and local ambulance service to create a dispatch protocol for the volunteer fire service. The department works hard to make the most of its limited funding which is used to cover all aspects of fire response, including engines, water tenders, rescue vehicles, medical supplies, equipment, station maintenance, training, fuel, insurance, and more. While the current financing levels are adequate to deliver services, they continue to search for long-term funding opportunities that will support increased administrative capacity, volunteer staffing programs, apparatus and equipment replacement, and training/certification.

## City of Portola

The City of Portola incorporated in 1946 and was formed as a general law city. Though it is the only city in Plumas County, there have been two attempts to disincorporate, but neither were approved by LAFCo. The adjacent unincorporated communities Lake Davis, Grizzly Ranch, Iron Horse, Gold Mountain, and Delleker all impact the City, particularly services related to fire, safety, traffic, and the environment. Historically, the City's population has experienced periods of decline and periods of growth. The 2020 census showed the City had a population of 2,100 which is similar to the reported 2010 population<sup>1</sup>.

In December of 2017, the City was alerted to significant deficiencies in its Volunteer Fire Department's operation. Recognizing it could not quickly remedy the shortcomings, the City decided to stand down its Volunteer Fire Department and entered into a contract with Eastern Plumas Rural Fire Protection District (EPRFPD) to provide Fire and Emergency Medical Services (EMS) to the City. Previous to its fire department's stand-down, the City was the long-term contract provider of fire and EMS to the Gold Mountain CSD. Subsequently, Gold Mountain CSD also entered into a contract with EPRFPD for services.

In 2021, the City of Portola began contracting with Beckwourth FPD to provide fire protection services. This contract was put into effect on February 1, 2021, and lasts for two years. The contract is for \$73,000 per year and is paid in two semiannual installments. The City of Portola is also directly responsible for other billable expenses such as utilities, taxes, building upkeep, insurance, equipment repair and purchases for both city stations. The two city stations are staffed by part time duty officers and volunteer firefighters. In 2021 Beckwourth FPD responded to 24 alarm calls, 22 fire, 10 hazard, 231 medical, 4 service and 3 vehicle calls in the City totaling 294 responses. Together the two stations house three engines, one water tender, and one support vehicle (an old ambulance). Both stations were recently renovated in 2021 and are in good condition.

The City reports a possible fire flow deficiency in a few areas resulting from the elevation and distance relative to their south water tank. For now, the City will activate two water wells for fire incidents in those areas. The City has reported the current funding levels are adequate, but recent declines in revenue meant trimming expenditures.

---

<sup>1</sup> US Census Bureau, 2010 & 2020 Decennial Census (DEC Redistricting Data PL 94-171), Table P1 – Portola city, California.

## Gold Mountain CSD

Gold Mountain CSD was formed in 1996 to serve the Gold Mountain Planned Development. The District received voter approval to elect an independent five-member board of directors in 2005. The bankruptcy of the original housing developer forced the board to overcome many challenges. The water and wastewater infrastructure were only partially built and no “as built” drawings were given to the CSD. The District now must continually develop plans and find financing for significant system improvements. This was due to construction defects that resulted in failing infrastructure that required replacement or remediation on an emergency basis. The District also had to rebuild a leach field and remediate landslide damage above the water storage tanks. This caused the initial reserves to be depleted in the first two years of being an independent district. The District’s underfunding was caused by subsidized water and sewer rates that were never adjusted, the developer’s delinquent payments on over 30 properties, no property tax funding for fire services, and no requirement for the developer to finish infrastructure buildout. The District lost a large amount of money while suing the developer for ownership of the infrastructure and water rights.

As mentioned above, Gold Mountain CSD previously had a contract with the City of Portola to provide fire services. They first entered into this contract in 1997 and the City continued to provide services until the City’s fire department disbanded in 2017. The District contracted with East Plumas Rural FPD (EPRFPD) to provide fire suppression, emergency medical, and fire prevention services between 2018-2022. The original contract was one year for \$35,000. In 2019, the District agreed to renew to a three year contract for \$36,050 with an annual 3 percent escalation option. The EPRFPD has a facility in Iron Horse that is not a full fire house, but it houses two pieces of equipment for the volunteer firefighters. The nearest full fire house is approximately 8 miles away. Although far, the EPRFPD has provided reliable services and met every call for service. The City of Portola’s South Side station is three miles from Gold Mountain and provides mutual aid to Gold Mountain as needed. Beginning January 2023, the Gold Mountain CSD will begin contracting with Beckwourth FPD.

## Sierra Valley FPD

Sierra Valley FPD was formed in 1948 to provide structural fire and basic life support services for the communities of Vinton and Chilcoot. The District encompasses approximately 220 square miles and is the largest in the County in terms of the total area within the boundary. It is located in the eastern part of the county and is surrounded by USFS and Bureau of Land Management (BLM) land. The District borders Beckwourth FPD and the Hallelujah Junction FPD (HJFPD) in Lassen County. The District contracts with HJFPD and responds to calls along both sides of SR 395 and both sides of SR 70 in Lassen County. The contract was voted to be extended in 2020. It is valid for three years with an automatic two-year extension.

The District’s highest call demand happens during the winter when they respond to an increased number of vehicle incidents typically caused by ice and snow conditions. There has been little change in service demand from 2017 to 2021. Currently, the finance levels are adequate to cover basic services, but the District would like to increase funding to increase its capacity and be prepared for larger emergency incidents. As of now, they are not in a position to handle large wildfires. Greater effectiveness and efficient service delivery by the District may be gained from expanded shared resources, such as training, shared administrative functions, or collectively pursuing grants with adjacent service providers. The District relies almost exclusively on property taxes, seasonal wildfire reimbursements from the federal government, and fundraising (no special tax or assessment is in place). They currently partner with a fundraising auxiliary to raise money for its operations.

## PROPOSED REORGANIZATION

---

To help address some of the challenges mentioned above, a Local Emergency Services Study Group (LESSG) was created in January 2020, as a framework for cooperative and collaborative action to explore ways to strengthen and improve the provision of fire and emergency services throughout the region. The group came to a consensus to begin the process of creating a new single fire district that will provide fire and emergency medical response services for the region.

Currently the City of Portola, Beckwourth FPD, Gold Mountain CSD, and Sierra Valley FPD are participating in the process to form the Beckwourth Peak FPD. Early in the process, the participating agencies also reached out to C-Road CSD and Eastern Plumas Rural FPD. However, at this time those agencies are not participating in the process to form the Beckwourth Peak FPD.

In order to provide adequate and sustainable fire protection services long-term in the east Plumas County region, the Beckwourth Peak FPD is proposed as outlined in the following sections.

### Formation of New Fire Protection District

The Beckwourth Peak FPD is proposed to be formed under Fire District Law of 1987 (Health & Safety Code §13800, et seq.) in order to provide fire protection services, rescue services, emergency medical services, hazardous material emergency response services, and other services relating to the protection of lives and property. The new 468 square mile district will be governed by a five-member board of directors initially elected at-large from within the District by registered voters residing within the boundaries of the District. Directors will serve staggered four-year terms with two directors initially being elected for a two-year term. As a special district, the Beckwourth Peak FPD would be supported by revenue from a combination of taxes, fees, grants, and fundraising.

Formation of the Beckwourth Peak FPD will be contingent upon establishment of a special tax and successful negotiation of a property tax exchange agreement with Plumas County. Combined, these two revenue sources could provide up to \$600,000 in annual revenue to the support the Beckwourth Peak FPD. This will allow the District to hire dedicated full-time and part-time emergency responders in addition to administrative support staff. It will also allow the District to provide the necessary training for staff and volunteers, purchase and maintain equipment, and improve and expand fire stations in the region.

### District Dissolutions

Concurrent with formation of the Beckwourth Peak FPD, the Beckwourth and Sierra Valley FPDs will be dissolved. All assets belonging to these districts will be transferred to the Beckwourth Peak FPD and as such, the Beckwourth Peak FPD will be the successor for the dissolved districts in accordance with §57451(d) of the CKH Act. Upon dissolution, all existing special taxes and assessments used to fund community fire protection and rescue services will terminate and the new voter-approved special tax would be levied in their place.

Should the New Fire District be unsuccessful in establishing a new special tax and/or negotiating a tax exchange agreement with Plumas County or otherwise fail to meet the conditions of approval for formation of the District, then the Beckwourth and Sierra Valley FPDs will not be dissolved. They will retain their assets and powers to provide fire and emergency response services. Additionally, any special taxes and assessments for the Districts will continued to be levied.

## Divestiture of Powers

Concurrent with the formation of the Beckwourth Peak FPD, the Gold Mountain CSD will proceed with a divestiture of power to provide fire protection, and the City of Portola will transfer responsibility for providing fire protection to the New Fire District. Gold Mountain CSD will maintain its powers to provide wildland fire response and hazardous fuels reduction and will continue to levy a special tax to support these services. The City of Portola will transfer all responsibility and assets related to fire protection services to the New Fire District.

In the event the formation of the Beckwourth Peak FPD fails as discussed under dissolutions, then the Gold Mountain CSD and City of Portola will retain their powers to provide community fire protection and emergency response and continue to levy all associated special taxes, assessments, and fees.

## PROPOSED BOUNDARY

The proposed Beckwourth Peak FPD boundary encompasses 468 square miles (approximately 300,000 acres) in eastern Plumas County and includes the communities of Portola, Beckwourth, Gold Mountain, Vinton, and Chilcoot. The proposed boundary as shown in Figure 2 generally follows the existing spheres of influence and goodwill response areas for the participating agencies with some revisions to better follow parcel lines. The boundary also includes the sphere of influence for the East Plumas Rural FPD but it excludes lands included in their district boundary. The proposed boundary includes all of the parcels where the Beckwourth Peak FPD is most likely to be called as the primary local responder.

An online map of the proposed boundary can also be accessed at this link: <https://arcg.is/G05yD>.

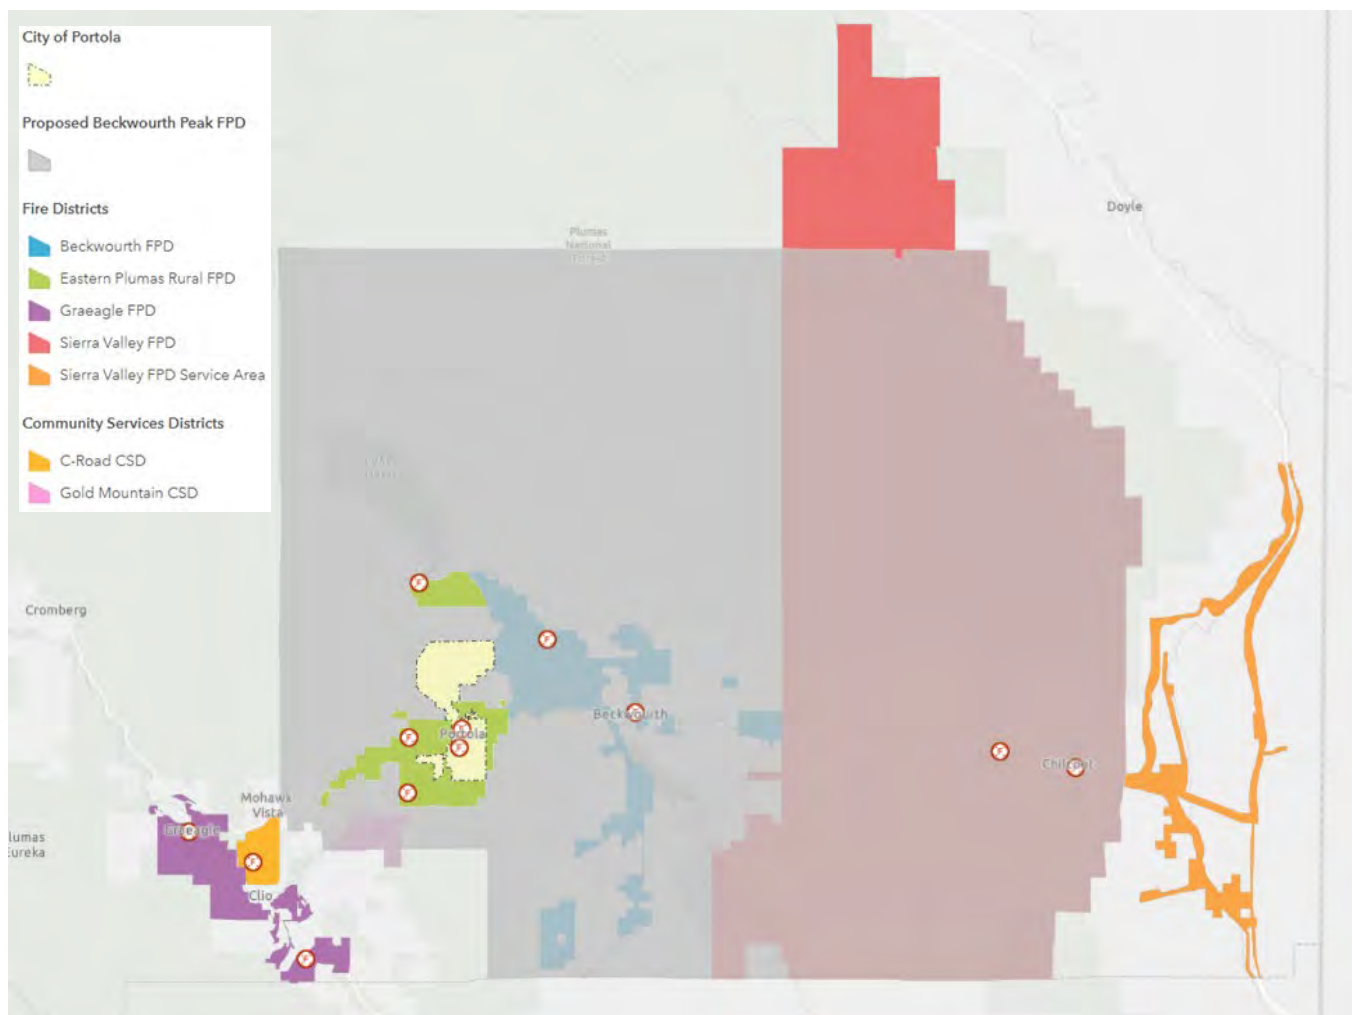

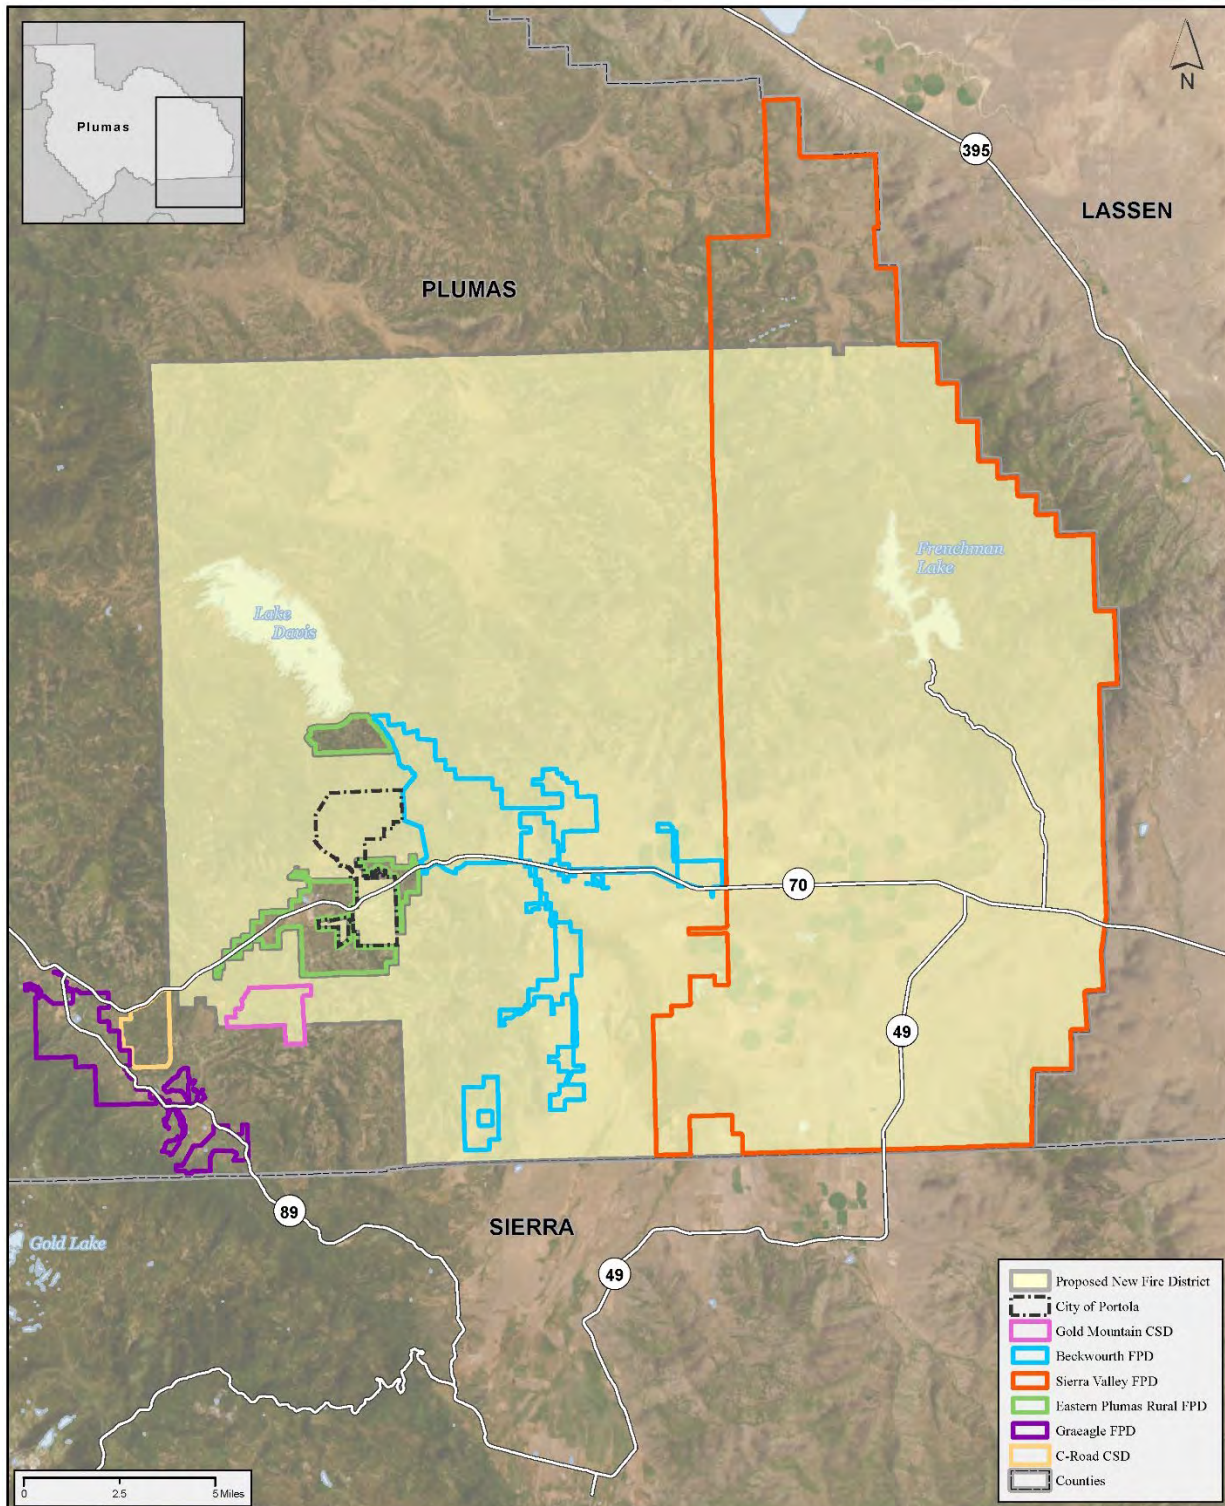

Figure 2: Proposed Beckwourth Peak FPD Boundary

# Proposed Beckwourth Peak Fire Protection District

Map Date: 2/8/2023

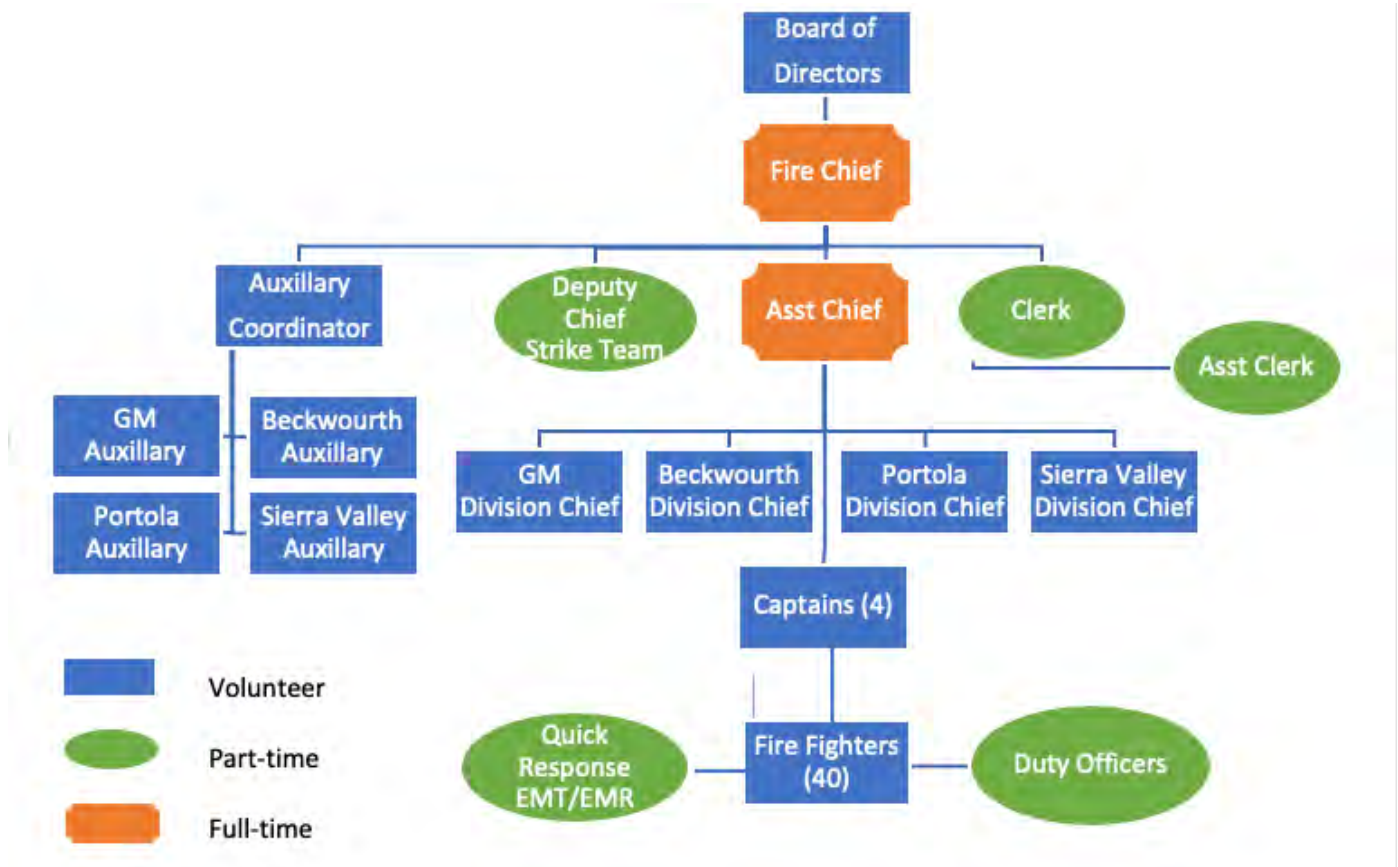

C

## ORGANIZATION AND STAFFING

The Beckwourth Peak FPD will be governed by a five-member Board of Directors elected by registered voters residing within the boundaries of the District. Directors will be elected at large from within the District in order to encourage more participation and interest in serving on the board. In order to establish staggered terms of office for directors, the initial board will have three directors elected to a four-year term and two directors elected to a two-year term. After the initial two-year term, all directors will be elected to four-year terms with no limit on the number of terms that can be served.

The Beckwourth Peak FPD will be served by a full time Fire Chief and Assistant Chief that oversee operations for the entire district, with support from a part time Deputy Chief. In addition, a part time Administrative Clerk and Assistant Clerk will provide administrative support for the District. Initially, there will be four divisions including Gold Mountain, Beckwourth, Portola, and Sierra Valley, each with its own Division Chief that will oversee the fire fighters, duty offices, and quick response EMT/EMRs assigned to that division. The organization chart below shows the general chain of command for the Beckwourth Peak FPD. Positions shown in orange monument shapes are paid full-time, those in green ovals are paid part-time, and those in blue rectangles are volunteer positions.

Figure 3: Beckwourth Peak FPD Organizational Chart

The Beckwourth Peak FPD is planned to have 2 full time paid positions (Chief and Assistant Chief) and 5 part time paid positions. The remainder of the positions will be supported by volunteers. Volunteers are vital to the successful and continued operation of the District as they will be the main responders to calls and oversee day-to-day operations of the District. It is anticipated that each division will be served by at least 10 volunteer firefighters along with a volunteer fire captain for each station and overseen by a division chief. The district will field a dedicated duty officer each day, who will be responsible for monitoring the radio at all times and ensuring an appropriate response to all calls for service as well as required documentation of the department's activities. Within the first five years, a second part time duty officer position will be added.

Every firefighter must pass a comprehensive training program (basic firefighter academy) and may be qualified in multiple positions. Training focuses on knowledge and skills of the many tasks a firefighter must be proficient in to effectively do their job including but not limited to structural, wildland, and vehicle fire tactics and safety, hose and nozzle evolutions, structural fire ventilation, forcible entry, search and rescue, low and high angle technical and rope rescue, vehicle extrication and rescue, and traffic control techniques and safety. Medical training involves CPR certification, basic first aid and Emergency Medical Responder (EMR) certification, with some members going on to Emergency Medical Technician (EMT) training and certification. Members are also trained in firefighter safety and emergency scene assessment identifying potential hazards for the responder.

Training is also provided in Rapid Intervention Crew Tactics in support of United States Occupational Safety and Health Administration (OSHA) policy 29 CFR 1910.134(g)(4)(i) which requires a dedicated exterior two-person firefighter rescue team when firefighters are operating inside a structure fire or other hazard area considered to be "Immediately Dangerous to Life or Health." The only exception to establishing a Rapid Intervention Crew is during actual rescue operations of a victim. This exterior crew is the rescue crew for the interior firefighters, and must be proficient at search and rescue, forcible entry, remote filling of self-contained breathing apparatus, and methods to quickly remove a downed firefighter.

As the volunteer firefighters become proficient, they begin to take on other skills, such as training to be certified as a Driver/Operator to begin driving and pumping fire apparatus. As they become skilled, firefighters may promote to Engineer as openings become available. From Engineer, one can later promote to Captain. As a Captain, one can initiate a Duty Officer Taskbook to build skills as a duty officer and assist with duty officer vacancies as needed. From Captain, members can also promote to Division Chief as vacancies permit.

## EQUIPMENT AND FACILITIES

Since the Beckwourth Peak FPD will be formed through consolidation of several existing agencies, all existing apparatus and other vehicles and equipment will be transferred to the New Fire District upon formation. The majority of the equipment will be located at one of six stations throughout the district. However, some of the equipment will not be located at a station but will instead be positioned at locations around the district that help reduce response times in the more remote areas of the district. This non-stationed equipment includes four response vehicles and one command vehicle. These are all considered to be in Fair condition and are planned for replacement in the next five to ten years.

The rest of the Beckwourth Peak FPD equipment will be located at the various stations as outlined below.

### Beckwourth Division

The Beckwourth Division will consist of a Division Chief, a captain, and numerous other first responders. This division will operate out of two stations located 180 Main Street, Beckwourth and 4076 Grizzly Road, Portola. The equipment available at each station is listed below.

#### Station 1 - Headquarters (180 Main St, Beckwourth)

- Type 1 Engine (2007): 750 gal water tank and 1,500 gpm pump
- Water Tender (2003): 1,500 gal water tank and 500 gpm pump (on loan from the USFS)
- Rescue Vehicle (1996): 5 seats, 3 scba seats
- Type 3 Wildland Engine (1999): 500 gal water tank and 500 gpm pump
- Type 7 Engine: 150 gal water tank and 150 gpm pump

#### Station 2 (4076 Grizzly Rd, Portola)

- Type 1 Engine (2000): 800 gal water tank and 1,250 gpm pump
- Type 3 Wildland Engine (1996): 500 gal water tank and 500 gpm pump
- Support Vehicle: Retired ambulance
- Response/utility vehicle 2011 F-250
- MCI Trailer

Most of the equipment at these two stations is considered to be in good condition and will likely not need to be replaced for another 15 years. However, the Type 3 Wildland Engine at Station 2 is considered to be in Fair condition and is planned for replacement in the next three years. Response times for this division will vary greatly based on location of the call and weather conditions.

## Portola Division

The Portola Division will consist of a Division Chief, a captain, and numerous other first responders. This division will primarily operate out of the North Side Portola fire station located at 420 North Gulling Street, Portola. The equipment available at each station is listed below.

### Station 3 - North Side (420 North Gulling St, Portola)

- Type 1 Engine (2008): 850 gal water tank and 1500 gpm pump
- Water Tender (1976): 3,000 gal tank
- Type 6 Engine - Medical (2017): 450 gal water tank and 300 gpm pump
- Medical Response Vehicle (2005)
- Type 3 Wildland Engine (1996): 500 gal water tank and 500 gpm pump (Belongs to Beckwourth Fire, on loan from the USFS)

### Station 4 - South Side (316 First Avenue, Portola)

- Type 1 Engine (2001): 750 gal water tank and 1250 gpm pump
- Response Vehicle: 5 seats

The water tender is considered to be in poor condition and is planned for replacement within the first year of formation of the New Fire District. The other equipment at these stations are considered to be in fair to good condition and are planned for replacement in 5-10 years. Response times from this station to the surrounding city areas are anticipated to be 5 to 10 minutes based on call location and weather conditions.

## Sierra Valley Division

The Sierra Valley Division will consist of a Division Chief, a captain, and numerous other first responders. This division will primarily operate out of the Chilcoot fire station located on the eastern edge of the New Fire District. The Vinton station is in poor condition and will require upgrades. The equipment available is listed below.

### Station 5 - Chilcoot Station (94362 CA-70, Chilcoot)

- Rescue Vehicle (1993)
- Type 3 Brush Engine (2004)
- Water Tender (1991)
- Type 1 Engine (1998)
- Type 1 Engine (1987)

- Utility Truck (1991)
- Air Trailer (2003)
- Type 4 Brush Truck (1969)

The equipment for the Sierra Valley Division is generally considered to be in fair condition and planned for replacement in the next five to ten years except for the Air Trailer which should be replaced within the next year. The Type 4 Brush Truck is considered to be in poor condition and should also be replaced in the next year. The Type 3 Brush Engine is considered to be in good condition and will not be replaced for approximately 15 years. Response times for this division will vary greatly based on location of the call and weather conditions.

## Gold Mountain Division

Gold Mountain has a very active Firewise community focused on training residents on prevention, home hardening, and evacuation. Gold Mountain CSD has a paid Fire Coordinator position and a Quick Attack Vehicle (QAV) during the summer fire season. The District's Fire Coordinator manages and trains a cadre of six to eight volunteers to operate the QAV in the event of a wildfire ignition within the District. The District does not authorize the QAV or Fire Cadre for structural firefighting. As mentioned previously, Gold Mountain CSD will maintain its powers to provide wildland fire response and hazardous fuels reduction and will continue to levy a special tax to support these services.

The Gold Mountain Division will ultimately consist of a Division Chief, a captain, and numerous other first responders once a new fire station in Gold Mountain is constructed. Initially the Beckwourth Peak FPD will operate out of South Side Portola fire station which is located 3 miles from Gold Mountain and support capacity building for improved response in that area of the district. Response times to the Gold Mountain area are anticipated to be 10 to 15 minutes depending on location of the call and weather conditions. There is also opportunity to strategically place a fire engine at a residence or other secure location to allow a quicker response to incidents in the community should any volunteers be recruited that live and/or work in the Gold Mountain area.

## FINANCIAL PLAN

---

Fire districts are becoming more costly to operate as prices rise for workers comp, insurance, fuel, personal protection equipment, apparatus, and other district needs. The sections below discuss the proposed budget for operation of the Beckwourth Peak FPD and the revenue sources proposed to support ongoing operations. This includes a new special tax that will be applied to properties within the Beckwourth Peak FPD boundary and a property tax exchange agreement with Plumas County.

The approval of a new special tax by the registered voters and the successful execution of a tax exchange agreement with the County are conditions of reorganization/formation approval. The revenue generated by these two key funding sources and continued fundraising, donations and grants will establish a reliable budget for which the Beckwourth Peak FPD will need to maintain and improve its capacity to provide the services.

The increased revenue will be used by the Beckwourth Peak FPD to sustain and improve community fire and rescue services by establishing the following ongoing programs and actions:

- ✂ A comprehensive volunteer recruitment and retention program to ensure that volunteer firefighters will continue to be available to support high quality fire protection services.
- ✂ Key staff to ensure operational and administrative effectiveness, including:
  - Hiring a Fire Chief, Assistant Chief, and part time administrative staffing to properly lead and direct the volunteer organization as well as manage records and expenditures.
  - Hiring a Deputy Chief that would partially be funded by strike team revenues and would maximize strike team effectiveness.
  - Hiring part time Duty Officers (firefighter/EMT) to ensure reduced response times (note that most of the calls are for emergency medical services such as vehicle accidents and general medical aid). Duty officers would be hired to provide daytime coverage at primary stations.
  - Hiring a part time Quick Response EMR to be on call (standby).
- ✂ Create a reserve fund that will support the regular replacement of apparatus and equipment, to ensure operational safety and effectiveness. This will ensure long-term stability and provide for consistent, high-quality provision of services for the New Fire District.
- ✂ Improve and expand the headquarters station in Beckwourth and support capacity building for improved response.
- ✂ Improve equipment staging and quick response in the western part of the Beckwourth Peak FPD and support capacity building for improved response in that area of the expanded District.

## Proposed Budget

The proposed budget considers several factors including consolidation of assets from the existing agencies, need to replace aging equipment and improve facilities, inflation rates, and the need for additional personnel. In order to create the proposed budget and 10-year projection for the Beckwourth Peak FPD, the prior expenditures for each individual agency currently providing fire and emergency response services were reviewed.

In Fiscal Year (FY) 2019-20, the four agencies had combined annual expenditures of approximately \$549,590 as shown in Table 6. The combined four-year average (FY 2016-17 through 2019-20) for the four agencies was \$509,892 in expenditures and \$720,269 in revenues as shown in Table 7. The largest expense is salaries and wages and services and supplies, which includes uniforms, maintenance, fuel, office expenses, professional services (such as auditors), strike team wages, medical supplies, and other costs associated with providing services. It is anticipated that these two categories will continue to make up the majority of expenses for the Beckwourth Peak FPD upon formation.

Source: California State Controller's Office (2017-2020)

Utilizing the prior expenditures as a baseline, the New Fire District budget was prepared. This included comprehensive review of staffing and operational needs for the Beckwourth Peak FPD, including salary and personnel cost projections, facility and capital improvement needs and costs, and equipment and apparatus replacement and reserve estimates. A detailed 10-year phased budget projection was developed for the Beckwourth Peak FPD as shown in Table 8. The first year after formation (projected to be FY2022-23) will largely consist of transferring assets and setting up the New Fire District. As such, expenses are projected to be minimal. During the first year of operation, the expected cost (total expenditures) for running the Beckwourth Peak FPD is projected to be approximately \$641,000. This will increase over time as additional staff is hired and upgrades are made to existing equipment and structures. Each subsequent year includes adjustments for inflation, purchase of new equipment, and bringing on additional personnel to support the District. At the end of the project 10-year period, the cost for running the Beckwourth Peak FPD is estimated to be approximately \$866,000. The projected budget, as proposed, would allow the Beckwourth Peak FPD to build up a healthy reserve balance to the support the District for up to eight months in the event of a fiscal emergency.

## SPECIAL TAX

A new revenue source will be required to support the Beckwourth Peak FPD's ability to build and sustain adequate community fire and rescue services for the entire service area. To this end, an annual special tax will be proposed for Assessor's Parcels located entirely or partially within the Beckwourth Peak FPD boundary, based on land use types provided by the Assessor's Office. The following table shows the division of land use types along with base rates and maximum rates. **Attachment A** contains a listing of Assessor's Use Codes and the applicable Rate ID that will be used as a guide for preparing the Beckwourth Peak FPD direct charge levies to the Plumas County Auditor-Controller for inclusion on the current year tax roll.

*Table 9: Proposed Special Tax Rates by Property Type*

	Rate ID	Base Rate	% of A	SF incl	Acre incl	Units incl	\$/add SF	\$/Add AC	\$/add Unit	Max Rate
<b>Residential Improved</b>	A	\$110.00		1,800			\$0.02			\$200
<b>Unimproved Land</b>	B	\$55.00	50%		2			\$1.00		\$75
<b>Ag &amp; Timber</b>	C	\$55.00	50%		80			\$0.05		\$75
<b>Multi Residential Improved</b>	D	\$82.50	75%			1			\$82.50	\$3,500
<b>Commercial Improved</b>	E	\$165.00	150%	2,700			\$0.06			\$1,500
<b>Industrial Improved</b>	F	\$192.50	175%	3,150			\$0.07			\$1,500
<b>Religious</b>	G	\$137.50	125%	2,250			\$0.05			\$250
<b>Recreational</b>	H	\$220.00	200%	2,700			\$0.08			\$3,500
<b>Non-Taxable/Exempt</b>	X	\$0								

- A. Residential Improved** – All residential single-family homes and ancillary residential uses will be allocated a base rate of \$110.00 for structures 1,800 square feet or less, with additional \$0.02 cents per square foot charged thereafter, with a maximum not to exceed \$200.00 per parcel.
- B. Unimproved Land** – All vacant/unimproved land will be allocated a base rate of \$55.00 for the first 2 acres, with \$1.00 charged for each acre thereafter, with a maximum not to exceed \$75.00 per parcel.
- C. Ag & Timber** – All agriculture and timber land will be allocated a base rate of \$55.00 for the first 80 acres, with \$0.05 cents charged for each acre thereafter, with a maximum not to exceed \$75.00 per parcel.
- D. Multi Residential Improved** – All multi-family, mobile home, manufactured homes, duplexes, condos, and ancillary residential uses will be allocated a base rate of \$82.50 per unit, with each additional unit charged \$82.50 thereafter, with a maximum not to exceed \$3,500.00 per parcel.
- E. Commercial Improved** – All commercial buildings will be allocated a base rate of \$165.00 for buildings 2,700 square feet or less, with additional \$0.06 cents per square foot charged thereafter, with a maximum not to exceed \$1,500.00 per parcel.
- F. Industrial Improved** - All industrial buildings will be allocated a base rate of \$192.50 for buildings 3,150 square feet or less, with additional \$0.07 cents per square foot charged thereafter, with a maximum not to exceed \$1,500.00 per parcel.
- G. Religious** - All improved religious land will be allocated a base rate of \$137.50 for buildings 2,250 square feet or less, with additional \$0.05 cents per square foot charged thereafter, with a maximum not to exceed \$250.00 per parcel.

- H. Recreational** - All Recreational land will be allocated a base rate of \$220.00 for buildings 2,700 square feet or less, with additional \$0.08 cents per square foot charged thereafter, with a maximum not to exceed \$3,500.00 per parcel.
- I. Non-Taxable/Exempt** – Exempt parcels include public owned parcels (United States of America and State of California, other local governmental agencies) and non-taxable parcels as determined by various statutes including, but not limited to, Disabled Veterans, Welfare Exemptions, Cemetery Exemptions, and Low Value exemptions, will not have the special tax imposed.

To support a baseline budget, the proposed special tax will raise approximately \$405,000 annually to plan, finance, implement, manage, own, and operate a regional Fire Protection District to provide community fire and emergency medical response services. The new special tax must be approved by two-thirds of the votes cast by registered voters residing within the proposed Beckwourth Peak FPD boundary.

If approved, the tax amount will be included on property owners' annual property tax bill distributed by the County. Although these taxes are collected by the County, they do not go to the state like property taxes; they will be deposited in a fund for the sole use of the Beckwourth Peak FPD (nominal processing and administration fees are charged by the County).

Three special tax provisions are proposed for the Beckwourth Peak FPD as follows:

- **Low Income Exemption** - The New Fire District recognizes the proposed special tax may create a burden for low income property owners in the region. For this reason, the Beckwourth Peak FPD shall establish procedures for implementing a Low Income Exemption, to allow landowners who fall within the U.S. Department of Housing and Urban Development (HUD) income limits for "very low" or "poverty level" to apply for a partial or complete exemption from the tax.
- **Contiguous Parcel Exemption** - The Beckwourth Peak FPD shall establish procedures for implementing a Contiguous Parcel Exemption to allow Assessors Parcels which are categorized as Rate ID "C" under provisions of the special tax, and contiguous, undeveloped, held under identical ownership, shall upon approval of an application of the owners thereof to the District Board, be treated as a single parcel for purposes of this special tax.
- **Inflationary Adjustment** - The proposed special tax will also include an inflationary adjustment to account for the ever-increasing costs of fire equipment, apparatus, diesel fuel, and insurance which typically increase at rates that exceed average inflation. To ensure that the proposed special tax will retain its purchasing power in future years, it is proposed to include an inflationary clause which will allow the New Fire District Board, to adjust the tax annually, if needed, by no more than the cost of living as measured by the Consumer Price Index (CPI) for All West Urban Consumers, Non-seasonally Adjusted, for the Preceding Year (Bureau of Labor Statistics Series ID CUUR400SAO). This increase will not exceed 3% each year and must be approved by resolution at a properly noticed public hearing.

If the new special tax is approved, all existing special taxes and assessments used to fund community fire protection and rescue services by the City of Portola, Beckwourth FPD, and Gold Mountain CSD would terminate and no longer be levied. Gold Mountain CSD will continue to levy a special tax to support wildland fire response and hazardous fuels reduction.

## TAX EXCHANGE AGREEMENT

---

In addition to proposing the establishment of a new special tax, the New Fire District will work with the County to receive a portion of property taxes that are already being collected. If negotiations are successful, the property tax exchange agreement would be approved by the County Board of Supervisors and could initially generate approximately \$200,000 per year. This would increase each year thereafter based on the growth in property value. This revenue will be in addition to the proposed special tax as discussed above. This tax exchange agreement represents a transfer of monies currently paid by the County to the existing agencies. Therefore, there will be no loss of revenue by the County and no additional cost to property owners.

## SUMMARY CONCLUSIONS

---

Forming the Beckwourth Peak FPD will establish a consistent, long-term community-based and locally controlled revenue source to support the sustainable delivery of fire protection services in eastern Plumas County. The proposed formation would officially merge the operations of the four fire agencies into one efficient, effective, and sustainable emergency services system. This would make possible a proactive solution for future fire and emergency service needs for the area by creating a regional district, with an improved economy of scale and associated benefits.

The approval of a new special tax by the registered voters AND the successful execution of a tax exchange agreement with the County are conditions of reorganization/formation approval. The revenue generated by these two key funding sources and continued fundraising, donations and grants will establish a reliable budget that will enable the Beckwourth Peak FPD to maintain and improve its capacity to provide fire protection services.

A stable, adequately funded district will attract quality volunteers both for firefighting as well as serving on the New Fire District board of directors. The Beckwourth Peak FPD will still heavily rely on volunteers, but the new district will have more revenue to support its volunteer firefighters through increased training opportunities and improved equipment. The Beckwourth Peak FPD will be eligible to apply for grant funding and access tax revenue that is available only to local government entities like fire districts.

## ATTACHMENT A

The use code assigned to a given parcel by the Assessor's Office, as well as other Assessor's information such as assessed value, site address, owner information, as well as visual inspection using aerial mapping and windshield surveys, shall be used as a guide in determining the appropriate tax rate to be applied. Where there is a question, the District shall use other means to verify the use of the property prior to applying the appropriate tax amount. Following is a list of Assessor's Use Codes and the applicable Rate ID that will be used as a guide for preparing the Beckwourth Peak FPD direct charge levies to the Plumas County Auditor-Controller for inclusion on the current year tax roll.

County Tax Sharing

The City of Portola shall petition the Board of Supervisors to transfer \$70,000, in total, of the City's existing base property tax revenue to the successor agency. The transfer formula shall be based upon the FY 2022/23 tax roll information maintained by the County Auditor to determine the effective tax allocation factor that would generate approximately \$70,000, in base property tax revenue. This is a base transfer that shall continue in perpetuity without further regard for the amount of revenue generated for the successor agency. Each fiscal year thereafter, the successor agency shall receive the base amount and its share of the annual tax increment derived according to the formula described above, based on the growth in assessed value. The City of Portola shall solicit the County to address existing tax rate incongruities resulting from historical boundary changes during tax sharing negotiations. All resolved incongruities shall be reflected in the FY 2022/23 tax roll information for purposes of the reallocation calculations described above.
